

LSU Light Source Unit

■ Product Overview

Light source unit is a stable light-emitting equipment. Inside use the DFB laser, its features is good light stability, high luminous power, long working life, etc. Output channel number can be customized, support luminous channels open or closed.

■ Product Features

- Good light stability
- High luminous power
- Long working life
- Support for luminous control

■ Performance Index

Parameters	Technical Index
Working Wavelength	1310nm / 1550 nm
Luminous Intensity Power	> -5dBm
Working Life	> 150000h
Connector	LC/PC
Channel Optional	4/8/16
